

Application **DEVELOPMENT**

a company

BUILT ON RESULTS

At SupraES, We develop custom application and software solutions for fixed-price projects that generate value and help streamline your business resources. Our hands-on approach towards application development delivers fast and tangible results helping you to drive your business forward.

With over a decade of experience in being at the forefront of technology, we employ high-calibre professionals across the globe to leverage tools and technologies that best suit each client and their customers, lending integral IT and enterprise support to dozens of industries.

REPORTS

Local Focus from

A GLOBAL NETWORK

Our custom applications are crafted around unique customer requirements, fusing modern design and robust Supra commitment to deliver powerful yet Agile applications. Moreover, with our robust off-shore support infrastructure, our clients enjoy affordable and fast-to-market business solutions backed up by world class application support.

From planning and design to testing and deployment, we are with you every step of the way to deliver what you need the most: An Agile Supra process.

What's the Problem?

With rapid digitization of the modern market underway, many businesses strive to implement trusted infrastructures to create new efficiencies and increase productivity while driving down costs.

Whether you want to build applications to set up new areas for business expansion, meet scalable enterprise needs for your clients, or even release your applications on consumer app stores, many businesses struggle with efficient planning, construction and implementation practices.

Where do Businesses Go Wrong?

- Application building costs go unchecked.
- Your expertise is not technology.
- Final application often fails to fulfil new or restructured requirements.
- Inefficient app development methodology leads to mismanagement of resources.
- Unclear development strategy/requirements for the final application.

What You Need?

What you need is a trusted technology partner to deliver refined goals for your application portfolio, which is where we come in. We help you focus on your core requirements within limits of your technology resources so that the final application delivers sound results based on versatile inputs.

As a full-service technology partner, that's the power we bring to the table. Starting from conceptualization to final deployment, we are with you every step of the way to realize your needs and deliver them in a cross-platform application package.

What Helps to Achieve?

- Managing your human and capital resources efficiently.
- Partnering with an experienced technology service to catalyse your development.
- Develop application flexibly to cater to fluctuating needs as well.
- Following a concise and Agile workplan to harness the best of all app development methodologies.
- Keeping a clear goal in mind to ease up pressure design and development phases.

What We Do?

From our core teams to our extensive IT network, we build agile applications based on decades of specialized knowledge, experience and a global perspective into the modern industry.

Our mantra: Be flexible. Be scalable. Innovate. With key focus on the Agile methodology, our mantra of constant yet flexible innovation distinguishes us from the pack. Over the years, we have continuously invested in upscaling our work, development infrastructure and real tangible assets so you don't have to.

How We Deliver?

- Carefully planned service packages help keep in mind budget sensitivity for businesses of all sizes.
- Decades of experience in this field puts us in a special position to cater to all your needs.
- Our Agile methodology combines the best of the industry standards with client requirements to deliver best-in-class applications.
- Ensuring customer satisfaction, our core application development team is always open to re-engineer applications to suit newer demands.
- We build quality relationships with our clients to fully understand their needs and ideas for clear cut application development.
- Our broad application development base expands across custom app development, managed application services, cross-platform mobile development or consulting services.

Delivering the SupraES Promise

We listen. We learn. And most important of all, we deliver. Keeping in mind budget conscious small to mid-size businesses, we believe our clients of the burden of quality assurance, on-time delivery of projects and application-specific support systems.

We put the best technologies and the best people at work for our clients, handing you back precious time and money so you can look to bigger ideas with us for expanding your business.
